

HOJ Building Concerns	Name of submitter so we can clarify if : Nearest office number to location identified	
All exterior walls in basement need to have proper treatment and water barriers in place to prevent future problems. This would mean removing the drywall in all outer offices. This would also allow for a true thorough inspection to determine if mold is present in more than the three rooms.	Sherise/Dawn R	Dist Ct Probation area
Carpet needs a deep and thorough cleaning by a carpet company	Sherise/Dawn R	
Crack in cement floor exposed to determine what needs to be done to repair it	Sherise/Lynn/Dawn R	Dist Ct. Probation area right at back entrance, and in office B120
Once all cleaning and repairs have been made, a professional duct work cleaning crew should thoroughly clean/disinfect all duct work and vents in all locations in the building	Sherise/Dawn R	
The entire building needs a deep cleaning and to be disinfected	Sherise/Dawn R	
Find source of bat entry and fix it finally. Once fixed, find areas with bat droppings and disinfect.	Sherise/Dawn R	
Fix leaky windows	Sherise/Dawn R	
Repair water damaged areas in hallway leading to Tammi Rodgers office	Sherise/Dawn R	Main floor, Magistrate office
Remove and replace moldy and water damaged drop ceiling	Sherise/Dawn R	
Replace drop ceilings in mold effected offices	Sherise/Dawn R	
Remove and replace moldy and water damaged drop ceiling	Ella	sink area behind Sm.Claims window
repair three water damaged window sills	Ella	Deb's office (formerly Marissa's office)
Handicap accessibility - bathrooms on first floor and basement of courthouse	Judge Stanton	
Water damage to ceiling tiles on the second floor of the courthouse	Judge Stanton	
The rooftop access door does not appear to have any weather stripping	John Sabatini	
Many stained ceiling tiles--??from roof or other overhead leaks??moldy water damaged	Janet K/Holly D	
Ceiling vents and screens need to be cleaned frequently--lots of visible dust/dirt buildup	Janet K/Holly D	all of 2nd floor--probably others as well
Heating & Cooling needs to be addressed and fixed, not banded	Holly D	2nd Floor
A qualified physician needs to review ALL of the mold and repair reports to determine if the building is no longer a threat to the health of all who work here.	Lynn	
Mold expert samples taken on 8/16/19 were done while the isolated source areas were still sealed off; need to have new samples done now that the isolated source areas have been opened up again	Courtne/Dawn R	Dist. Ct Probation area
The crawl/access space under the stairs right outside the probation clerks & next to office B143 has not had mold remediation done	Courtne	Dist. Ct Probation area
Why has only half of the drywall removed from the right wall of office B143? How can you determine that there is no mold on the upper half of the drywall still left on the wall?	Courtne	Dist. Ct Probation area
Establish time frame for continued monitoring of air quality with set testing dates. Air quality tests should be conducted at same locations each time.	Dawn R	Dist. Ct Probation area
Already added by Lynn, but I highly agree that a qualified physician needs to review ALL reports. The report themselves state that only a physician can determine safety.	Dawn R	Dist. Ct Probation area
Any furniture/fixtures/supplies, etc. left in treated offices needs cleaned and/or replaced if not able to clean efficiently. Ask a physician for guidelines on this to ensure health safety.	Dawn R	Dist. Ct Probation area
Is the issue with the bats and their feces going to be addressed along with the mold issues because it is a health concern	Christine/Jean	Circuit/Family Court Records
Is the air quality in the entire building going to be monitored during and after the removal of the mold?	Christine	Circuit/Family Court Records
