FOR IMMEDIATE RELEASE

September 1, 2016

Weekly Inland Lake Beach Report (Wednesday Sampling)

Samples Collected August 31, 2016, Reported September 1, 2016

<u>Beach</u>	<u>This weeks sample results E. coli count per 100ml</u>	<u>30 day Geometric Mean</u>	<u>Water Quality Index</u>
Gilbert Park (Long Lake)	0	1	1
Taylor Park (Long Lake)	15	5	1
Interlochen State Park (Duck Lake)	0	1	1
Twin Lakes Park (North Twin Lake)	0	2	1

<u>Water Quality Index</u>	<u>Body Contact Limits</u>	<u>E.coli/100ml (Single Event)</u>	<u>E.coli/100ml (30 day geo- mean)</u>
Level 1	E. coli levels meet MDEQ swimming standards for full body contact.	0-300	0-130
Level 2	E. coli levels meet MDEQ standards for wading, fishing, and boating. Contact above the waist not advised.	301-1000	131-1000
Level 3	E. coli levels exceed MDEQ standards, no body contact advised.	>1000	>1000
Level 4	Health Alert. E. coli levels and/or known gross contamination of beach waters. Avoid contact with beach waters.		

Note: Beach samples are routinely collected once a week. Therefore E. coli levels may not meet the Michigan Department of Environmental Quality (MDEQ) standards between sampling days. E. coli levels are more likely to increase after a storm.

Note: For those beaches utilizing the geometric mean of three individual samples, if beach samples contain more than 130 E.coli/100ml, as a 30-day geometric mean, a notice for that beach will be set at the water quality index of 2 and will remain until the 30-day geometric mean is below 130 E.coli per 100ml.
